

Lean Maintenance Made Simple

Are you ready to
evolve to the
2025 version of
maintenance?

A short course on how to
build your own Factory
Race Team

We will provide you or your staff with the conceptual understanding, methods, resources CONFIDENCE and inspiration to successfully turn your maintenance department into a professional team.

The training is relevant to management and trades staff alike and is an essential primer to those responsible for maintenance management.

MESNZ life member and multi-national maintenance management expert Craig Carlyle will explain how maintenance management works in the real world. He will show you how to create proactive maintenance functions that can add tangible dollars to your bottom line using nothing other than your trades knowledge and simple PC tools.

Attendees are invited to use their own workplace examples.

No pre-requisite qualifications are required.
They don't teach this stuff!

Prefer training on your own site?
Yes this can be arranged!
